Hello all,

Due to a recent job promotion and very hectic schedule, I was only able to log 2 flights for the month of July.

DEN-LAX B767-300 FL360 cruise altitude
2 hours, 24 minutes flight time
33,120.64 Lbs fuel used. 139 Pax aboard

LAX-SEA B737-400
FL 340 cruise 1 hour, 58 minutes flight time
13,438.26 Lbs Fuel used
89 Pax aboard

First flight flown using Level-D Simulations B767-300
Second Flight flown using Precision Manuals Design Group 737

Real Time weather, fuel planning, and high altitude routing all used for flights. No problems to report other than discrepancy in FMC on 767 approach plate.

Always be safe and have fun flying
